BABY ON BOARD - NUREMBERG MAKES IT EASY

Register the birth and apply for child benefit - everything on one page and with the signature of both parents.

Together with the Nuremberg South Clinic and the Theresien Hospital, the City of Nuremberg and the Familienkasse Bayern Nord offer parents of newborns born in Nuremberg a special service. With the combined application, they save several administrative procedures and applications.

One application - many advantages.

Already at home, parents can inform themselves about everything that is important after the birth and prepare the application. Parents can find all the important information in the "Information on the combined application" - also in Arabic, Bulgarian, English, Polish, Romanian, Russian and Turkish.

The completed combined application form with the necessary documents can either be brought to the birth and handed in at the clinic. Parents can find the forms online here. Or have all the necessary documents (see "Information on the combined application") ready - together with a staff member of your maternity clinic you can fill out the application. The clinic will then forward everything to the authorities. Parents can concentrate fully on their offspring.

This is what parents can prepare

➢ WHO (mother or father) should apply for child benefit?
➢ To which account should the child benefit be paid?
➢ Have the required documents ready - all the necessary documents are listed on the information sheet for the combined application.
➢ The pre-filled combined application is best kept in the clinic bag!

Back at home

Parents receive by post quickly and automatically:

✓ the birth certificates from the City of Nuremberg

✓ the notification of the tax identification number for your child from the Federal Central Tax Office (Bundeszentralamt für Steuern)

✓ the child benefit notification from your family benefits office.

You will find all the important information in the information on the combined application.

The Nuremberg combined application - quick and easy.
