

United Nations OECD

Junior Professional Officer Programme (JPO) Chiffre Nr. 2023-1-21

General Information:

Job title: JPO – Energy Resilience

Division: Energy and Environment Division (EED).

Agency: Organisation for Economic Co-Operation and Development OECD

Location: Paris, France

Duration of assignment: 2 years with possibility of extension for another year. The extension of appointment is subject to yearly review concerning priorities, availability of funds and satisfactory performance.

Please note that for participants of the JPO programme two years work experience are mandatory! Relevant work experience can be counted. In order to assess the eligibility of the candidates, we review the relevant experience acquired after obtaining the first university degree (usually bachelor's degree)

The Organisation for Economic Co-operation and Development (OECD) is an international organisation comprised of 38 member countries, that works to build better policies for better lives. Our mission is to promote policies that will improve the economic and social well-being of people around the world. The Organisation provides a unique forum in which governments work together to share experiences on what drives economic, social and environmental change, seeking solutions to common problems.

The International Energy Agency (IEA) is an intergovernmental organisation that provides authoritative analysis, data, policy recommendations, and real-world solutions to help countries provide secure and sustainable energy for all. It operates as an autonomous body within the framework of the OECD. The IEA seeks a Junior Policy Analyst to join a small team of enthusiastic professionals reporting to the Head of the Environment and Climate Change Unit (ECC) in the Energy and Environment Division (EED). The analyst will be supporting work on energy sector resilience, in the context of ongoing projects on understanding climate impacts on the energy sector, as well as of policy measures and other actions to enhance the resilience of energy system to climate change.

Main Responsibilities

Research and Analysis

- Participate in modelling and data analysis regarding climate impacts on energy systems in various countries and regions, e.g. physical, social and economic impacts of climate change that could alter future energy supply and demand.
- Analyse socioeconomic costs and benefits of measures for enhancing climate resilience, and identify effective policy measures and best practices.
- Track and provide insights on key developments in the climate, energy and environment policy landscape of specific countries relevant to the climate resilience of energy systems, including for input to a range of IEA reports.
- Provide overall support for communication and dissemination of the analytical work, including through drafting written outputs for publication, and preparation of speeches, briefings and presentations as needed.

Engagement and Outreach

- Support organization of workshops and conferences to move forward policy analysis and discuss findings, gathering national and international stakeholders and experts.
- Promote the work of the Agency as appropriate through presentations and bi-lateral meetings; organize and participate in workshops as required; assist in the development of web content, outreach materials, and briefs on relevant aspects of energy and climate policy.

Ideal Candidate Profile

Academic Background

- A **Master's Degree** in environmental and/or climate science fields, applied sciences (including engineering, energy technology), public policy, economics or other relevant discipline.

Professional Background

- A minimum of two years of relevant experience in policy, scientific and/or economic analysis in the areas of energy and climate, preferably in national and international contexts.
- Excellent understanding of climate models and scenarios, energy technologies and policies.
- Experience in drafting policy papers or reports, and an ability to translate technical information into clear, concise, and policy relevant messages.

Skills

- Excellent drafting and analytical skills, particularly strong quantitative skills.
- Excellent knowledge of Microsoft Excel
- Experience working with GIS, Python, and/or statistical software would be an asset.
- Excellent interpersonal skills.

Languages

- Fluency in one of the two OECD official languages (English and French) and knowledge of the other, with a commitment to reach a good working level.

Core Competencies

- For this role, the following competencies would be particularly important: Achievement focus, Analytical thinking, Drafting skills, Teamwork and Team leadership, Client focus, Diplomatic sensitivity, Organisational alignment, Strategic networking.
- Please refer to the level 3 indicators of the OECD Core Competencies.

The OECD is an equal opportunity employer and welcomes the applications of all qualified candidates [who are nationals of OECD member countries], irrespective of their racial or ethnic origin, opinions or beliefs, gender, sexual orientation, health or disabilities. (Internal and external).

The OECD promotes an optimal use of resources in order to improve its efficiency and effectiveness. Staff members are encouraged to actively contribute to this goal.
