

Make it in Germany

Online Workshop

The new online counselling service on working and living in Germany

The online portal www.make-it-in-germany.com is the first contact point for applicants from abroad who are interested in taking up work in Germany.

Via this platform, the International and Specialized Services (ZAV) offer personal counselling via email, phone, text chat and video chat.

Additionally, we provide counselling at international job fairs and information events.

As of now, we have expanded our services to include an OnlineWorkshop.

In two modules, "Working and living in Germany" and "A successful application", we counsel students, graduates and skilled workers worldwide who are interested in working in Germany.

Via live broadcast, the ZAV instructors will present the topics to the group event participants and will answer questions afterwards.

Would you like to receive further information or book an OnlineWorkshop?
We are looking forward to your request!
